## Missing Terms

Sheet 3

Find the missing term in each equation.

1)  $12c - 2 + \underline{\hspace{2cm}} - 5 + 3c = 25c - 7$

2)  $7p + 3 + 7 + 10p - \underline{\hspace{2cm}} = 15p + 10$

3)  $5x + 15 - 2x - 12 = 3x + \underline{\hspace{2cm}}$

4)  $-15 - 7a + 12 - 13a + 3 = - \underline{\hspace{2cm}}$

5)  $\underline{\hspace{2cm}} - 3y - 4 + 8$

$+ 8 = -6m + \underline{\hspace{2cm}}$

7)  $21s + 10 - 13s -$

$0 + 3x + 2 = -8x + 52$

9)  $\underline{\hspace{2cm}} + 12 + 2d -$

$- 15u = - \underline{\hspace{2cm}}$

Find the value of 'a'

1)  $5x - 12 + a - 3x = 2x - 8$

2)  $6y + 4 + a = 3y + 4$

a = \_\_\_\_\_
