

# Underground Wonderland

by Guy Bellaranti

Carlsbad Caverns National Park is in the state of New Mexico. There are over 100 caves here. One of the better explored caves is Carlsbad Cavern. It features one of the largest underground chambers in the world.

## CARLSBAD CAVERNS

Tours leave from \_\_\_\_\_ and go to different parts of the park. Wearing a jacket is a good idea because the temperature is 56 degrees Fahrenheit.

Two tours are self-guided tours require a guide.

Some of the guides go through tight spots and have age restrictions. One of the chambers. The guide turns off the lights for a minute and for many people it's actually fun!

## NATURAL PARK

Carlsbad Caverns National Park guides. The tours often involve crawling and are easier and have no age restrictions. Many beautiful chambers. At the top, the guide turns off the lights sound scary, but

The two self-guided routes are very popular. You can rent audio listening guides for these tours. They are fun to listen to and provide a lot of information. On a self-guided tour, you walk at your own pace. One self-guided route begins at the cavern's huge Natural Entrance and the other starts deep in the cavern at the Big Room. Both tours feature many beautiful and interesting sights.

Name : \_\_\_\_\_

The Natural Entrance route is 1¼ miles long and follows a steep paved trail where you descend 750 feet. That is like going down 75 stories! You pass many places including Bat Cave, Devil's Spring, Witch's Finger and the Boneyard. At the bottom is an underground rest area with a place to buy lunch food and sit at tables. Restrooms are also located here.

The Big Room route begins near the underground lunchroom and is also 1¼ miles in length. Some people walk it after walking down the Natural Entrance route.

A favorite ranger talk is the bat flight program. This program runs on evenings from late May into October and occurs in an area outside the natural entrance. The ranger talks for a while. Then, as the sun sets, bats fly from the cave. At first, there are only a few, but then the numbers grow into the hundreds and then thousands. The bats eat millions of insects every night and return near dawn. The flight is an amazing sight to see.
