

Name : _____

Profit and Loss Word Problems

Sheet 3

- 1) Miranda paid \$9,177 for a used car. She also spent \$323 in repairs. After a few months, she sold it for \$7,885. Find the loss percent.

- 2) Bob sold a handmade wooden jewelry box for \$192. If the price of making the box was \$124, what is the profit value?

- 3) Jane gives her brother a box of products worth \$120. The actual price of the products was \$150.

- 4) Jason sold a large quantity of shrimps for \$120. If the shrimps had been purchased for \$150, what is the profit percent?

- 5) Steve purchased a patio furniture set for \$360. After years of use, the set was sold at 55% loss. Calculate the loss amount.
