## Constant of Proportionality

Sheet 4

Find the constant of proportionality(k) for each linear relationship.

1)  $19x = 57y$

2)  $\frac{2y}{x} = 42$

3)  $\frac{3y}{45x} = 1$

4)  $12y = 10x$

5)  $66y = 48x$

7)  $8y - 72x = 0$

9)  $\frac{96y}{x} = 12$

10)  $-52x + 13y = 0$
