Evaporation

Evaporation is the process of water changing from a liquid state to a gaseous state.

Condensation

Condensation is the process of water vapor changing from a gaseous state to a liquid state.

Transpiration

Transpiration is the process of water being released from plants into the atmosphere as water vapor.

Precipitation

Precipitation is the process of water falling from clouds to the Earth's surface in the form of rain, snow, sleet or hail.

Surface Runoff

Surface runoff is the flow of water that reaches the Earth's surface but does not infiltrate the soil. It is called surface runoff.

Accumulation

Accumulation is the process of collection of water in ponds, lakes, rivers, oceans and other water bodies.
