

Student Name: _____

Score: _____

Find G.C.F by Factor Tree Method

Example: 4 and 6

$$4 = 2 \times 2$$

$$6 = 2 \times 3$$

GCF of 4 and 6 is 2

56 and 84

63 and 81

GCF of 56 and 84 = _____

GCF of 63 and 81 = _____

90 and 65

72 and 96

GCF of 90 and 65 = _____

GCF of 72 and 96 = _____

Student Name: _____

Score:

Answers

56 and 84

63 and 81

GCF of 56 and 84 = 28

GCF of 63 and 81 = 9

90 and 65

72 and 96

GCF of 90 and 65 = 5

GCF of 72 and 96 = 24
