Circle Trivia

1. What do you call two or more circles with the same center?

Answer: _____

2. How many diameters can be drawn for any circle?

Answer: _____

3. What shape is created when a circle is folded along the diameter?

Answer: _____

4. What do you call a part of a circle with a center and two radii at two corners?

Answer: _____

5. What shape is created when several circles with the same radius are glued on top of each other?

Answer: _____

6. What is the name of the measurement that is double the length of the radius?

Answer: _____

7. What is the angle of any circle?

Answer: _____

8. What do we call the perimeter of a circle?

Answer: _____

Student Name: _____ Score: _____

Answers:

1. What do you call two or more circles with the same center?

Answer: **Concentric circles**

2. How many diameters can be drawn for any circle?

Answer: **Infinite**

3. What shape is created when a circle is folded along the diameter?

Answer: **Semi circle**

4. What do you call a part of a circle with a center and two radii at two corners?

Answer: **Sector**

5. What shape is created when several circles with the same radius are glued on top of each other?

Answer: **Cylinder**

6. What is the name of the measurement that is double the length of the radius?

Answer: **Diameter**

7. What is the angle of any circle?

Answer: **360⁰**

8. What do we call the perimeter of a circle?

Answer: **Circumference**
