Points Trivia

1) What is the thickness of a point?

Answer: _____

2) What is the area of a point?

Answer: _____

3) What is the minimum number of points required to draw a unique straight line?

Answer: _____

4) What geometric figure can you form by joining any three non collinear points?

Answer: _____

5) What do you call it when three or more points lie in a straight line?

Answer: _____

6) What is the point of intersection of the medians of a triangle?

Answer: _____

7) What is the orthocenter of a triangle?

Answer: _____

8) What do you call the point of intersection of the angle bisector of a triangle?

Answer: _____

Student Name: _____ Score: _____

Answers

1) What is the thickness of a point?

Zero

2) What is the area of a point?

Zero

3) What is the minimum number of points required to draw a unique straight line?

Two

4) What geometric figure can you form by joining any three non collinear points?

Triangle

5) What do you call it when three or more points lie in a straight line?

Collinear

6) What is the point of intersection of the medians of a triangle?

Centroid

7) What is the orthocenter of a triangle?

Orthocenter is a point of intersection of altitudes of a triangle.

8) What do you call the point of intersection of angle bisector of a triangle?

Incenter
