In a camp activity, a group of girls and boys went fishing every day Monday through Friday. A bar graph was made to show the number of fish they caught each day. Use the bar graph to answer the questions.

1) How many fish did the two teams catch on Tuesday in all?

2) On which days did the boys’ team catch more fish than the girls’ team?

3) Which team caught more fish on Friday?

4) How many fish did the two teams catch in all?

5) Which team caught the fewer fish in all: the boys’ team or girls’ team?
