Find the circumference of each circle. Round the answer to two decimal places. (use π = 3.14)

1) Area = 19.31 in²
   Radius =
   Diameter =
   Circumference =

2) Area = 151.67 yd²
   Radius =
   Diameter =
   Circumference =

3) Area = 168.25 ft²
   Radius =
   Diameter =
   Circumference =

4) Area = 437.21 yd²
   Radius =
   Diameter =
   Circumference =

5) Area = 1157.53 in²
   Radius =
   Diameter =
   Circumference =

6) Area = 100.59 ft²
   Radius =
   Diameter =
   Circumference =

7) The area of a CD is 100 in². What is the circumference of the CD?
   Circumference =

8) If a pudding occupies the area 275.68 in², what will be the circumference of the pudding?
   Circumference =

Find the circumference of each circle. Round the answer to two decimal places. \((\text{use } \pi = 3.14)\)

1) \(\text{Area} = 19.31 \text{ in}^2\)
   - Radius = \(2.48 \text{ in}\)
   - Diameter = \(4.96 \text{ in}\)
   - Circumference = \(15.57 \text{ in}\)

2) \(\text{Area} = 151.67 \text{ yd}^2\)
   - Radius = \(6.95 \text{ yd}\)
   - Diameter = \(13.9 \text{ yd}\)
   - Circumference = \(43.65 \text{ yd}\)

3) \(\text{Area} = 168.25 \text{ ft}^2\)
   - Radius = \(7.32 \text{ ft}\)
   - Diameter = \(14.64 \text{ ft}\)
   - Circumference = \(45.97 \text{ ft}\)

4) \(\text{Area} = 437.21 \text{ yd}^2\)
   - Radius = \(11.8 \text{ yd}\)
   - Diameter = \(23.6 \text{ yd}\)
   - Circumference = \(74.10 \text{ yd}\)

7) The area of a CD is 100 \(\text{in}^2\). What is the circumference of the CD?
   - Circumference = \(35.41 \text{ in}\)

8) If a pudding occupies the area 275.68 \(\text{in}^2\), what will be the circumference of the pudding?
   - Circumference = \(58.84 \text{ in}\)
