Find the circumference of each circle in terms of \( \pi \).

1) \( \text{Circumference} = \) 

2) \( \text{Circumference} = \) 

3) \( \text{Circumference} = \) 

4) \( \text{Circumference} = \) 

5) \( \text{Circumference} = \) 

6) \( \text{Circumference} = \) 

7) Calculate the circumference of a circle having a diameter of 8 yd in terms of \( \pi \). 

8) What is the circumference of a circle with a radius of 17 in? Write your answer in terms of \( \pi \). 

Circumference = 

Circumference =

Find the circumference of each circle in terms of \( \pi \).

1) \( \text{Radius} = 12 \text{ in} \)

Circumference = \( 24\pi \text{ in} \)

2) \( \text{Diameter} = 9 \text{ ft} \)

Circumference = \( 9\pi \text{ ft} \)

3) \( \text{Diameter} = 3 \text{ yd} \)

Circumference = \( 6\pi \text{ yd} \)

4) \( \text{Diameter} = 14 \text{ ft} \)

Circumference = \( 14\pi \text{ ft} \)

5) \( \text{Radius} = 2 \text{ yd} \)

Circumference = \( 38\pi \text{ yd} \)

6) \( \text{Radius} = 11 \text{ in} \)

Circumference = \( 11\pi \text{ in} \)

7) Calculate the circumference of a circle having a diameter of 8 yd in terms of \( \pi \).

Circumference = \( 8\pi \text{ yd} \)

8) What is the circumference of a circle with a radius of 17 in? Write your answer in terms of \( \pi \).

Circumference = \( 34\pi \text{ in} \)
