

Decimals

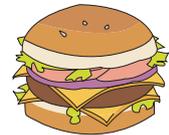

Mul/div: S1

Solve each problem. Round the answer to two decimal places.

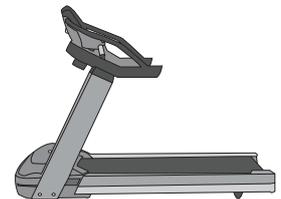

- 1) Chuck is on a weeklong vacation and wants to hire a car for a few days of sightseeing. A car rental agency offers him a compact car for \$49.79 a day. If he rents out the car for 3 days, how much does he need to pay the agency in total?

- 2) On Thanksgiving Day, Nicole buys 5 pounds of ground beef from the local store to make hamburgers. If one pound of ground beef is priced at \$5.67, how much was Nicole billed for altogether?

- 3) Heidi takes 45 minutes to cover a distance of 5.4 miles on a treadmill. Find the average distance covered by Heidi in one minute.

- 4) Kimberly makes 127.81 fl.oz of honey-basil lemonade for her nieces and nephews. She pours it out equally into 15 glasses. How many fluid ounces of honey-basil lemonade does one glass hold?

- 5) Ryan and two of his friends contribute \$8.33 each, to buy a baseball bat from a sports shop. Find the price of the baseball bat.
