## Fact Family - Addition & Subtraction

Sheet 1

Write four different facts to represent each model.

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

Color 5 circles pink and the rest blue.

$$\underline{\quad} \text{ pink circles} + \underline{\quad} \text{ blue circles} = \underline{\quad} \text{ circles}$$

$$\underline{\quad} \text{ blue circles} + \underline{\quad} \text{ pink circles} = \underline{\quad} \text{ circles}$$

$$\underline{\quad} \text{ circles} - \underline{\quad} \text{ pink circles} = \underline{\quad} \text{ blue circles}$$

$$\underline{\quad} \text{ circles} - \underline{\quad} \text{ blue circles} = \underline{\quad} \text{ pink circles}$$

Color 4 rectangles green and the rest red.

$$\underline{\quad} \text{ green rectangles} + \underline{\quad} \text{ red rectangles} = \underline{\quad} \text{ rectangles}$$

$$\underline{\quad} \text{ red rectangles} + \underline{\quad} \text{ green rectangles} = \underline{\quad} \text{ rectangles}$$

$$\underline{\quad} \text{ rectangles} - \underline{\quad} \text{ red rectangles} = \underline{\quad} \text{ green rectangles}$$

$$\underline{\quad} \text{ rectangles} - \underline{\quad} \text{ green rectangles} = \underline{\quad} \text{ red rectangles}$$

**Fact Family - Addition & Subtraction**

Write four different facts to represent each model.

$$\underline{2} + \underline{1} = \underline{3}$$

$$\underline{1} + \underline{2} = \underline{3}$$

$$\underline{3} - \underline{1} = \underline{2}$$

$$\underline{3} - \underline{2} = \underline{1}$$

$$\underline{3} + \underline{16} = \underline{19}$$

$$\underline{16} + \underline{3} = \underline{19}$$

$$\underline{19} - \underline{3} = \underline{16}$$

$$\underline{19} - \underline{16} = \underline{3}$$

Color 5 circles pink and the rest blue.

$$\underline{5} \text{ pink circles} + \underline{7} \text{ blue circles} = \underline{12} \text{ circles}$$

$$\underline{7} \text{ blue circles} + \underline{5} \text{ pink circles} = \underline{12} \text{ circles}$$

$$\underline{12} \text{ circles} - \underline{5} \text{ pink circles} = \underline{7} \text{ blue circles}$$

$$\underline{12} \text{ circles} - \underline{7} \text{ blue circles} = \underline{5} \text{ pink circles}$$

Color 4 rectangles green and the rest red.

$$\underline{4} \text{ green rectangles} + \underline{4} \text{ red rectangles} = \underline{8} \text{ rectangles}$$

$$\underline{4} \text{ red rectangles} + \underline{4} \text{ green rectangles} = \underline{8} \text{ rectangles}$$

$$\underline{8} \text{ rectangles} - \underline{4} \text{ red rectangles} = \underline{4} \text{ green rectangles}$$

$$\underline{8} \text{ rectangles} - \underline{4} \text{ green rectangles} = \underline{4} \text{ red rectangles}$$
