

Name : _____

Adding Unlike Fractions

Proper / Mixed: S5

1) $1\frac{1}{6} + 5\frac{1}{3} + 4\frac{1}{2} =$

2) $\frac{3}{4} + \frac{5}{8} + \frac{19}{24} =$

3) $\frac{3}{16} + \frac{1}{8} + \frac{7}{32} =$

4) $\frac{2}{3} + 7\frac{7}{9} + \frac{1}{2} =$

5) $6\frac{1}{4} + 1\frac{2}{5} + 8\frac{3}{10} =$

$2\frac{5}{6} =$

7) $\frac{11}{12} + \frac{15}{36} + \frac{1}{3} =$

$\frac{8}{14} =$

9) $\frac{3}{5} + \frac{10}{15} + 4\frac{1}{3} =$

$\frac{5}{8} =$

11) $2\frac{7}{9} + 3\frac{5}{6} + \frac{17}{18} =$

12) $3\frac{9}{10} + 1\frac{1}{2} + 2\frac{4}{5} =$

13) $\frac{6}{8} + \frac{21}{24} + \frac{11}{12} =$

14) $\frac{2}{3} + \frac{7}{9} + \frac{16}{27} =$

Name : _____

Answer Key

Adding Unlike Fractions

Proper / Mixed: S5

$$1) 1\frac{1}{6} + 5\frac{1}{3} + 4\frac{1}{2} = 10\frac{6}{6} = 11$$

$$2) \frac{3}{4} + \frac{5}{8} + \frac{19}{24} = \frac{52}{24} = \frac{13}{6}$$

$$3) \frac{3}{16} + \frac{1}{8} + \frac{7}{32} = \frac{17}{32}$$

$$4) \frac{2}{3} + 7\frac{7}{9} + \frac{1}{2} = 7\frac{35}{18} = 8\frac{17}{18}$$

$$5) 6\frac{1}{4} + 1\frac{2}{5} + 8\frac{1}{2}$$

$$2\frac{5}{6} = 5\frac{29}{12} = 7\frac{5}{12}$$

$$7) \frac{11}{12} + \frac{15}{36} + \frac{1}{3}$$

$$\frac{8}{14} = \frac{23}{14}$$

$$9) \frac{3}{5} + \frac{10}{15} + 4\frac{1}{2}$$

$$\frac{5}{8} = \frac{43}{24}$$

$$11) 2\frac{7}{9} + 3\frac{5}{6} + \frac{17}{18} = 5\frac{46}{18} = 7\frac{5}{9}$$

$$12) 3\frac{9}{10} + 1\frac{1}{2} + 2\frac{4}{5} = 6\frac{22}{10} = 8\frac{1}{5}$$

$$13) \frac{6}{8} + \frac{21}{24} + \frac{11}{12} = \frac{61}{24}$$

$$14) \frac{2}{3} + \frac{7}{9} + \frac{16}{27} = \frac{55}{27}$$
