

Name : _____

Subtracting Proper Fractions

Difficult: S5

1) $\frac{32}{38} - \frac{14}{38} =$

2) $\frac{15}{16} - \frac{8}{16} =$

3) $\frac{5}{7} - \frac{2}{7} =$

4) $\frac{45}{49} - \frac{38}{49} =$

5) $\frac{49}{55} - \frac{24}{55} =$

7) $\frac{62}{85} - \frac{39}{85} =$

9) $\frac{33}{36} - \frac{9}{36} =$

11) $\frac{9}{10} - \frac{2}{10} =$

12) $\frac{20}{21} - \frac{16}{21} =$

13) $\frac{47}{58} - \frac{33}{58} =$

14) $\frac{68}{77} - \frac{46}{77} =$

Name : _____

Answer Key

Subtracting Proper Fractions

Difficult: S5

$$1) \quad \frac{32}{38} - \frac{14}{38} = \frac{18}{38} = \frac{9}{19}$$

$$2) \quad \frac{15}{16} - \frac{8}{16} = \frac{7}{16}$$

$$3) \quad \frac{5}{7} - \frac{2}{7} = \frac{3}{7}$$

$$4) \quad \frac{45}{49} - \frac{38}{49} = \frac{7}{49} = \frac{1}{7}$$

$$5) \quad \frac{49}{55} - \frac{24}{55} = \frac{72}{96} = \frac{3}{4}$$

$$7) \quad \frac{62}{85} - \frac{39}{85} = \frac{20}{43}$$

$$9) \quad \frac{33}{36} - \frac{9}{36} = \frac{15}{60} = \frac{1}{4}$$

$$11) \quad \frac{9}{10} - \frac{2}{10} = \frac{7}{10}$$

$$12) \quad \frac{20}{21} - \frac{16}{21} = \frac{4}{21}$$

$$13) \quad \frac{47}{58} - \frac{33}{58} = \frac{14}{58} = \frac{7}{29}$$

$$14) \quad \frac{68}{77} - \frac{46}{77} = \frac{22}{77} = \frac{2}{7}$$
