

# Frequency Tables

- 1) For one month, a gardener monitored the growth of various plants and recorded their heights in inches. Use the data provided to complete the frequency table, summarizing the distribution of plant heights.

Height Range (Inches)	Frequency
9 - 12	

13 6  
21 24  
18 15

**PREVIEW**

- 2) The screen time (in minutes) of 20 teenagers was tracked daily over a week. Use the recorded data to complete the frequency table.

Frequency

90 32  
72 49  
41 84

- 3) A book club recorded the reading duration (in hours) of members who completed a historical novel. Use the given data to complete the frequency table.

3 8  
9 5

Reading Duration (Hours)	Frequency
1 - 3	
4 - 6	
7 - 9	
10 - 12	
13 - 15	

i) Which reading duration interval is the most common?

ii) How many members finished reading the novel within 12 hours?

iii) How many members spent 10 hours or more to complete the novel?
