

Frequency Tables

1) The following data represents the daily commute time (in minutes) for 20 students traveling to school. Organize the data into a frequency table to illustrate the distribution of commute times.

21	16	23	30	24	19	22	(minutes)	Frequency
18	24	28	25	20	15	18	16 - 20	
							21 - 25	
							26 - 30	

PREVIEW

2) A delivery company monitored the distances covered by its fleet of 20 trucks in a single day. The recorded distances, in kilometers, are given below. Organize the data into a frequency table.

60	38	50	44	53	48	45	54	Frequency
51	43	47	42	39	46	52	46 - 50	
49	55	41	37	45	51	48	51 - 55	
							56 - 60

3) Mr. Howie's class received the following scores on a test of 100 questions. The scores were recorded.

70	84	51	74	68	77	81
97	66	79	82	75	90	65

Test Score	Frequency
51 - 60	
61 - 70	
71 - 80	
81 - 90	
91 - 100	

- i) How many students scored between 61 and 70?
- ii) What is the total number of students who scored above 80?
- iii) Which range of scores is least common?
