

Name : _____

Mean, Median, and Mode

Sheet 3

Round your answers to two decimal places.

- 1) In an English assessment, 50 students were given scores out of 100. The scores have been organised into intervals as shown. Use the data to calculate the mean, median, and mode.

Score Range	10 - 20	20 - 30	30 - 40	40 - 50	50 - 60	60 - 70
Number of Students	5	15	11	6	10	10

Mean = _____ Median = _____ Mode = _____

- 2) At a local farmers' market, fruit sellers packed apples in 30 cartons to sell to customers. Analyze the data below and

Number of Apples	10 - 45
Number of Cartons	3

Mean = _____ Median = _____ Mode = _____

- 3) Doug, a trainer at a gym, tracked the number of push-ups completed by 90 members in one minute. Use the data below to calculate the mean, median, and mode.

Push-ups	1 - 24
Number of Members	12

Mean = _____ Median = _____ Mode = _____

- 4) A shipping company tracks the weight of packages shipped. Analyze the data below

Package Weight (lb)	25 - 50	50 - 75	75 - 100	100 - 125	125 - 150
Number of Packages	6	14	18	10	7

Mean = _____ Median = _____ Mode = _____
