

Two-way Frequency Tables

1) A total of 130 people were surveyed about their fast-food choices and meal times. The table shows their preferences for burgers, pizza, or sandwiches at lunch and dinner. Use the data to respond to the questions.

Lunch	28	22	10
Dinner	35	20	7

a) What is the frequency of people who prefer pizza for lunch?

b) How many people choose burgers for dinner?

c) Do more people prefer sandwiches for lunch or dinner?

2) Members of a gym preferred time and their preferred time questions.

	Cardio	Training	Yoga
Morning	90	10	10
Evening	40	10	10

b) Most gym enthusiasts prefer working out in the morning.

c) Which time do members prefer yoga in?

3) To learn about travel destinations and preferred destinations accordingly.

Flight	100	50	10
Road Trip	40	60	30

a) Which destination was least popular overall?

b) What is the total number of clients who preferred road trips?

c) How many clients preferred city vacations overall?
