

Name : \_\_\_\_\_

## GCF - Fractions

ES4

Reduce each fraction to its lowest term.

1)  $\frac{14}{12}$   
GCF of 14 and 12 = \_\_\_\_\_

$$\frac{14}{12} \div \frac{\square}{\square}$$

$$\frac{14}{12} = \underline{\hspace{2cm}}$$

2)  $\frac{25}{20}$   
GCF of 25 and 20 = \_\_\_\_\_

$$\frac{25}{20} \div \frac{\square}{\square}$$

$$\frac{25}{20} = \underline{\hspace{2cm}}$$

3)  $\frac{9}{18}$   
GCF of 9 and 18 = \_\_\_\_\_

$$\frac{9}{18} \div \frac{\square}{\square}$$

$$\frac{9}{18} = \underline{\hspace{2cm}}$$

5)  $\frac{6}{10}$   
GCF of 6 and 10 = \_\_\_\_\_

$$\frac{6}{10} \div \frac{\square}{\square}$$

$$\frac{6}{10} = \underline{\hspace{2cm}}$$

7)  $\frac{18}{21}$   
GCF of 18 and 21 = \_\_\_\_\_

$$\frac{18}{21} \div \frac{\square}{\square}$$

$$\frac{18}{21} = \underline{\hspace{2cm}}$$

8)  $\frac{2}{10}$   
GCF of 2 and 10 = \_\_\_\_\_

$$\frac{2}{10} \div \frac{\square}{\square}$$

$$\frac{2}{10} = \underline{\hspace{2cm}}$$
