

Name : _____

GCF - Fractions

MS4

Reduce each fraction to its lowest term.

1) $\frac{36}{70}$
GCF of 36 and 70 = _____

$$\frac{36}{70} \div \frac{\square}{\square}$$

$$\frac{36}{70} = \underline{\hspace{2cm}}$$

2) $\frac{27}{42}$
GCF of 27 and 42 = _____

$$\frac{27}{42} \div \frac{\square}{\square}$$

$$\frac{27}{42} = \underline{\hspace{2cm}}$$

3) $\frac{42}{98}$
GCF of 42 and _____

$$\frac{42}{98} \div \frac{\square}{\square}$$

$$\frac{42}{98} = \underline{\hspace{2cm}}$$

4 = _____

5) $\frac{50}{80}$
GCF of 50 and _____

$$\frac{50}{80} \div \frac{\square}{\square}$$

$$\frac{50}{80} = \underline{\hspace{2cm}}$$

6 = _____

7) $\frac{9}{81}$
GCF of 9 and 81 = _____

$$\frac{9}{81} \div \frac{\square}{\square}$$

$$\frac{9}{81} = \underline{\hspace{2cm}}$$

8) $\frac{18}{60}$
GCF of 18 and 60 = _____

$$\frac{18}{60} \div \frac{\square}{\square}$$

$$\frac{18}{60} = \underline{\hspace{2cm}}$$
