

Identifying Graphs

Two-step: S2

Choose the correct graph that best describes the solution for each inequality.

1) $5x + 4 \leq 39$ or $2x - 5 > 17$

2) $\frac{2x}{5} < 4$ and $16 + 3x \geq 10$

3) $13 \leq \frac{5x}{2} + 3 < 27$

$6x + 5 > -25$

5) $9 < 9 + 4x < 73$

$4x - 5 \geq 35$
