

# Identifying Graphs

Two-step: S2

Choose the correct graph that best describes the solution for each inequality.

1)  $5x + 4 \leq 39$  or  $2x - 5 > 17$

2)  $\frac{2x}{5} < 4$  and  $16 + 3x \geq 10$

3)  $13 \leq \frac{5x}{2} + 3 < 23$

$6x + 5 > -25$

5)  $9 < 9 + 4x < 73$

$4x - 5 \geq 35$
