

Evaluating Expressions

Sheet 1

1) Evaluate the following expressions for $s = -1$, $t = 7$, and $u = 12$.

i) $s \times 4$

ii) $t \div s \times u \div 8$

iii) $u \div 6 \times s$

2) Evaluate the following expressions for $a = 5$, $b = 3$, and $c = 10$.

i) $a \times 5 \div b \times c$

iii) $a \times 12 \div a$

3) Evaluate the following expressions for $p = 2$, $q = 3$, and $r = -13$.

i) $p \times q \div r$

iii) $q \times r \div 13 \times 7$

4) Evaluate the following expressions for $m = 4$ and $n = 15$.

i) $(-m) \div 2 \times m$

ii) $n \div 9$

iii) $n \times m \times 3$

Answer key**Evaluating Expressions**

Sheet 1

1) Evaluate the following expressions for $s = -1$, $t = 7$, and $u = 12$.

i) $s \times 4$

-4

ii) $t \div s \times u \div 8$

 $-\frac{21}{2}$ or $-10\frac{1}{2}$

iii) $u \div 6 \times s$

-22) Evaluate the following expressions for $a = 5$, $b = 5$, and $c = 10$.

i) $a \times 5 \div b \times c$

iii) $a \times 12 \div a$

123) Evaluate the following expressions for $p = 2$, $q = 3$, and $r = -13$.

i) $p \times q \div r$

0

iii) $q \times r \div 13 \times 7$

634) Evaluate the following expressions for $m = 4$ and $n = 15$.

i) $(-m) \div 2 \times m$

-8

ii) $n \div 9$

 $\frac{5}{3}$ or $1\frac{2}{3}$

iii) $n \times m \times 3$
