

Determiners and Quantifiers

A **quantifier** is a word or a phrase that specifies the amount of the noun that follows it. Quantifiers function as adjectives answering the question

"how much" or "how many".

Example: There are several reasons why this is a bad decision.

PREVIEW

Underline the quantifier, and circle the noun it quantifies in each sentence.

1) Would you like some sugar in your coffee?

2) Few far

3) Not many

4) Gavin likes his

5) There wasn't

6) Most people who

7) Is there any reason you're upset with me?

8) The store

9) We didn't have enough food for everyone.

10) I still have a lot of work left to do.
