

Determiners and Quantifiers

A **quantifier** is a word or a phrase that specifies the amount of the noun that follows it. Quantifiers function as adjectives answering the question

"how much" or "how many".

Example: Grandma adds lots of butter to her mashed potatoes.

PREVIEW

Underline the quantifier, and circle the noun it quantifies in each sentence.

1) No sane person would deny such a reasonable request.

2) There were many people at the concert.

3) Paula bought a few apples.

4) We don't have a big car.

5) Are there any books?

6) The Moires stole a little money.

7) Some guests chose fish, while others chose lamb.

8) Dad has a lot of money.

9) The kids saw many cows grazing in the meadow.

10) Grandpa donated much of his wealth to charity.
