Do you know what nocturnal animals are? Nocturnal animals are animals that are active at night. They stay awake at the night and have special abilities that help them survive. For example, nocturnal animals don't have fur. They tend to have better hearing and eyesight.

They sleep during the day and are active at night. These creatures have special abilities that help them survive. For example, nocturnal animals don't have fur. They tend to have better hearing and eyesight. They also have special abilities that help them survive. For example, nocturnal animals don't have fur. They tend to have better hearing and eyesight.

Being a nocturnal animal helps animals survive. It helps them avoid predators that roam in the daylight. It also helps them find food among creatures that are sleeping in the dark.

## Editing and Proofreading

### Nocturnal Animals

Do you know what nocturnal means? A **nocturnal** animal is an animal that sleeps during **the** day and stays awake at ~~the~~ night. Owls, foxes, and bats can all be nocturnal. These creatures have **abilities** that help them function in the dark. **They're** abilities are ones that non-nocturnal animals don't have. For instance, **their** eyes can function well in low **lighting** and sense of smell. **This** helps them as they navigate dark places. Being a **nocturnal** animal helps **some** animals survive. It helps them avoid **predators** that **roam** in the **daylight**. It also helps them find food among **creatures** that **are** sleeping in the dark.
