

**MCQ**

1) Which of the following graph represents the equation  $y = \frac{2}{3}x + 5$  ?

2) Which of the following graph represents the equation  $y = 4x - 4$  ?

3) Which of the following graph represents the equation  $y = -\frac{1}{2}x + 3$  ?

4) Which of the following graph represents the equation  $y = \frac{1}{2}x - 2$  ?

5) Which of the following graph represents the equation  $y = -\frac{5}{3}x - 2$  ?
