

Name : _____

Finding Mean

Sheet 1

- 1) A community gardening club conducted a survey to determine how many trees are grown in the backyards of 50 households. The data collected is given below. Find the mean number of trees.
- 2) Jason tracked the amount of snowfall at his mountain cabin in Vermont over 15 weekends. Use the data to calculate the mean snowfall per weekend in inches.

Number Trees x	Number of Households f	$f \cdot x$	Snowfall (inches) x	Number of Weekends f	$f \cdot x$
2	6		1	4	
3	1		2	2	
4			3	1
