

Finding Mean

- 1) Logan kept track of the number of miles he drove each day for 60 days as part of a travel journal. Use the information to find the mean number of miles he drove per day.
- 2) Ms. Higgins, a museum staff member, has recorded the number of visitors each day over the past 25 days. Use the data provided to calculate the mean number of visitors.

Miles x	Number of Days f	$f \cdot x$	Number of Visitors x	Number of Days f	$f \cdot x$
9	1		2	9	
11	1		35	5	
15	9			6	
18			56	2	
19
