

Multiplying and Dividing Money

1) Kathy and her friends stopped at the ice cream stand on a summer afternoon and bought 3 ice cream cones. How much money did they spend?

2) Joyce has \$20.00 in her pocket. She bought 4 ice cream cones. How much money did she have left?

3) Jason bought 5 sundaes, while Walter bought 2 ice cream floats. Who spent more money?

4) Frank spent \$72.00 on sundaes. How many sundaes did he buy?

5) There was a 'buy 3 get 1' offer on ice cream bars. If Peter spent \$21.00 on ice cream bars, how many bars did he get?
