

Multiplication

- 1) A rectangle is 9 inches long and 7 inches wide. Find the area of the rectangle.
(Area of a rectangle = length*width)

- 2) A wall is 8 feet high. A fence that is built over it is four times the height of the wall.
What is the height of the fence?

- 3) David walks 3 miles per hour. How far does he walk on average in 5 hours?

- 4) A flashlight requires 2 batteries. How many batteries would 8 such flashlights require?

- 5) Frank won a medal for each of the 6 track and field events that he participated in. How many medals did he win in all?
