1) Arrange the trees from shortest to tallest.

2) Which tree is the tallest? Why?

3) If you could plant a tree in your yard, which tree would you choose?

4) Arrange the trees from tallest to shortest.

5) If the shortest tree is replaced with a White Birch that is 25 feet tall, what is the new order?

6) Where would a 50-foot birch tree fit in the list from tallest to shortest?
