

## Commutative Property of Multiplication

A) Write the missing numbers using the commutative property.

1)  $2 \times 4 = \underline{\hspace{2cm}} \times 2$

2)  $7 \times 6 = 6 \times \underline{\hspace{2cm}}$

3)  $\underline{\hspace{2cm}} \times 8 = 8 \times 5$

4)  $3 \times \underline{\hspace{2cm}} = 9 \times 3$

B) Find the product

1) If  $9 \times 5 = 45$ ,

$5 \times 9 = \underline{\hspace{2cm}}$

3) If  $2 \times 3 = 6$ ,

$3 \times 2 = \underline{\hspace{2cm}}$

C) Tom arranges 6 shelves with 6 books on each shelf. Apply the commutative property to find the number of books.

$= 3$ , then

$= \underline{\hspace{2cm}}$

$= 28$ , then

$= \underline{\hspace{2cm}}$

arranges 8 shelves. Find the number of books? Write the multiplication equations.
