right triangle

5) In triangle UVW, the sides UV and VW measure 10 yd and 6 yd respectively. Prove that UVW is a right triangle.

$$UV^2 = 100 \text{ yd}, VW^2 = 36 \text{ yd}$$

$$VW^2 + UV^2 = UV^2 + VW^2 = 136 \text{ yd}$$

UVW is a right triangle.

6) In triangle LMN, the sides LM, MN and LN measure 9 in, 15 in and 12 in respectively. Prove that LMN is a right triangle.

$$LM^2 = 81 \text{ in}, MN^2 = 225 \text{ in}, LN^2 = 144 \text{ in}$$

$$LM^2 + LN^2 = MN^2$$

LMN is a right triangle.
