

Pythagorean Theorem

Sheet 1

Determine the missing length in each right triangle using the Pythagorean theorem. Round the answer to the nearest tenth.

1)

BC = _____

2)

PQ = _____

3)

UW = _____

4)

XZ = _____

5)

EF = _____

6)

JL = _____

7)

MN = _____

8)

ST = _____

9)

CE = _____

Pythagorean Theorem

Sheet 1

Determine the missing length in each right triangle using the Pythagorean theorem. Round the answer to the nearest tenth.

1)

$$BC = \underline{\mathbf{9 \text{ yd}}}$$

2)

$$PQ = \underline{\mathbf{\sqrt{29} \approx 5.4 \text{ in}}}$$

3)

$$UW = \underline{\mathbf{\sqrt{45} \approx 6.7 \text{ ft}}}$$

4)

$$XZ = \underline{\mathbf{\sqrt{205} \approx 14.3 \text{ in}}}$$

5)

$$EF = \underline{\mathbf{6 \text{ ft}}}$$

6)

$$JL = \underline{\mathbf{\sqrt{458} \approx 21.4 \text{ yd}}}$$

7)

$$MN = \underline{\mathbf{\sqrt{320} \approx 17.9 \text{ ft}}}$$

8)

$$ST = \underline{\mathbf{\sqrt{15} \approx 3.9 \text{ yd}}}$$

9)

$$CE = \underline{\mathbf{\sqrt{170} \approx 13 \text{ in}}}$$
