

Solving Equations - Rectangles

1) Perimeter = 116 yd

$x =$ _____
 length = _____
 width = _____

2) Perimeter = 138 ft

$x =$ _____
 length = _____

3) Perimeter = 98 in

$x =$ _____
 length = _____
 width = _____

2 yd

5) Perimeter = 62 ft

$x =$ _____
 length = _____
 width = _____

in

$x =$ _____
 length = _____
 width = _____

Solving Equations - Rectangles

1) Perimeter = 116 yd

$x = \underline{\quad -1 \quad}$

length = 35 yd

width = _____

2) Perimeter = 138 ft

$x = \underline{\quad -6 \quad}$

length = 36 ft

width = 33 ft

3) Perimeter = 98 in

$x = \underline{\quad \quad}$

length = _____

width = _____

_____ 2 yd

_____ 6

length = 50 yd

width = 41 yd

5) Perimeter = 62 ft

$x = \underline{\quad 11 \quad}$

length = 17 ft

width = 14 ft

_____ in

_____ in

$x = \underline{\quad -4 \quad}$

length = 11 in

width = 8 in
