**Rhombus**

A) Find the value of  $x$  and then find the indicated side length in each rhombus.

1)

$x =$  24

AB = 33

2)

$x =$  7

21 yd

3)

$x =$  17

TW = 50

18

73 ft

B) Solve for  $x$  and  $y$

the length.

5)

$x =$  7

$y =$  85

WZ = 17 in

$x =$  -30

$y =$  12

JK = 67 yd
