

Creating Scatter Plots

- 1) Scott, a tech gadget reviewer on YouTube, tests if video length affects ad revenue. Make a scatter plot using the data.

Video Length (minutes)	Ad Revenue (\$)
3	25
10	22
12	20
15	18
20	15
25	90
30	125

- 2) Kevin tests if the number of simultaneous users affects the average response time. Make a scatter plot using the data.

Number of Simultaneous Users	Average Response Time (seconds)
20	5
30	8
40	13
50	15
60	18
70	20

- 3) A computer club tests if the number of simultaneous users affects the average response time. Make a scatter plot using the data.

Number of Simultaneous Users	Average Response Time (seconds)
20	5
30	8
40	13
50	15
60	18
70	20
