## Answer key

# Parts of a Plant

**Flowers are colorful and aromatic. They are the reproductive part of a plant.**

**Fruits are the seed-bearing structure. They are fleshy and edible part of a plant.**

**The leaf prepares food for the plant by a process called photosynthesis. Leaves are known as the food factory of the plant.**

**The stem bears leaves, buds, flowers and fruits. The stem conducts water and minerals from the root to the other parts of the plants.**

**Roots are buried in the soil and provide support to the plant.**

**The roots absorb water and minerals from the soil.**
