# River System

**Source**  
Also called headwaters of a river, it is the place where the river begins.

**Waterfall**  
Water from a river or stream falling from a great height, when it flows over a steep incline

**Meander**  
A series of curves, bends, turns or windings in the channel of a river

**Delta**  
A low, flat area of alluvial deposits where a river splits into several branches before flowing into the sea

**Ocean / Sea**  
An ocean is the vast body of salt water, into which rivers flow.

**Tributary**  
Tributaries are rivers or streams that flow into a larger river or a lake.

**Floodplain**  
A low lying flat area near a river that is flooded when the river is full and flows over

**River mouth**  
A river mouth is the place where a river enters another river, a lake, a reservoir, a sea, or an ocean.
