## Perimeter of a Square

Sheet 3

Example :

$$\begin{aligned} \text{Perimeter} &= 16 \text{ ft} \\ \text{Perimeter} &= 4 \times \text{Side} \\ 16 \text{ ft} &= 4 \times \text{Side} \\ \frac{16}{4} &= \text{Side} \\ \text{Side} &= \mathbf{4 \text{ ft}} \end{aligned}$$

**Ans = 4 ft**

Find the side length of each square.

1)

Perimeter = 32 ft

Side length =

2)

Perimeter = 88 yd

length =

4)

Perimeter = 64 yd

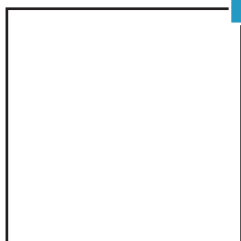

Side length =

Perimeter = 72 in

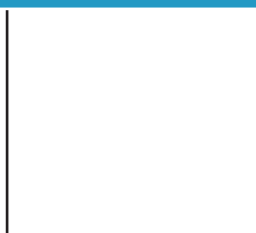

length =

7)

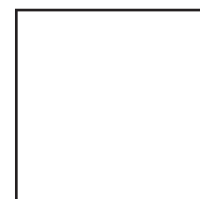

Perimeter = 56 yd

Side length =

Perimeter = 92 in

Side length =

Perimeter = 20 ft

Side length =
