Also requires a board to keep track of the board to match the subtraction and

To determine who wins, the player who obtains the larger number of points is the winner.

The player who

How to Play:

Kim rolls the dice and moves across zero'. She will stack and award points will be awarded.

The 'Subtraction' board game. The 'Subtraction' board game. Two points. No negative marking.

The next player, Ben, rolls the dice and moves on a space where there is a question card. For example, Ben lands on a space where there is a question card. He gets an extra turn at rolling the dice.

And, if a player lands on a space where there is a question card, they have been used up;

Kim and Ben will continue playing the game until all the question cards are exhausted. The scorekeeper will declare the player with the most points as the winner.

Learning Outcome:

Subtract-o-poly board game helps students to learn subtraction of numbers up to 99 in a fun and relaxed environment. The game incorporates subtraction at every turn of the game.
