Find the surface area of each figure. Round your answer to two decimal places. (use $\pi = 3.14$)

1) 
\[
\text{Surface Area} = \]

2) 
\[
\text{Surface Area} = \]

3) 
\[
\text{Surface Area} = \]

4) 
\[
\text{Surface Area} = \]

5) 
\[
\text{Surface Area} = \]

6) 
\[
\text{Surface Area} = \]
Find the surface area of each figure. Round your answer to two decimal places. (use \( \pi = 3.14 \))

1) Surface Area = \( \boxed{1,222 \text{ ft}^2} \)

2) Surface Area = \( \boxed{361.1 \text{ yd}^2} \)

3) Surface Area = \( \boxed{331.63 \text{ yd}^2} \)

4) Surface Area = \( \boxed{690 \text{ in}^2} \)

5) Surface Area = \( \boxed{1,157 \text{ in}^2} \)

6) Surface Area = \( \boxed{282.6 \text{ ft}^2} \)
