

## Evaluate

Evaluate each expression using trigonometric fundamental identities.

1)  $\sec^2 14^\circ - \cot^2 76^\circ - \csc^2 52^\circ + \tan^2 38^\circ$       2)  $\tan^2 \frac{\pi}{36} \cos^2 \frac{\pi}{36} + \cos^2 \frac{\pi}{36}$

3)  $\frac{1 - \cos^2 \frac{3\pi}{20}}{\sin^2 \frac{3\pi}{20}}$  +

$\sec 47^\circ + \sin 90^\circ$

5)  $9 + (\cos^2 16^\circ -$

$\sin \frac{19\pi}{45} + \csc \frac{\pi}{6}$
