A) Find the volume of each cube.

1) Volume =

2) Volume =

3) Volume =

B) Find the volume of each cube from the given side length.

4) side length = 8 ft

Volume =

5) side length = 20 in

Volume =

6) side length = 11 in

Volume =

7) side length = 3 yd

Volume =

8) The length of each side of a cubical wooden block is 16 inches. What is the volume of the block?

Volume =
8) The length of each side of a cubical wooden block is 16 inches. What is the volume of the block?

\[4,096 \text{ cubic inches}\]
