A) Find the volume of each rectangular prism.

1) 

![Rectangular Prism 1]

Volume = 

2) 

![Rectangular Prism 2]

Volume = 

3) 

![Rectangular Prism 3]

Volume = 

B) Find the volume of each rectangular prism from the given parameters.

4) length = 19 in ; width = 17 in ; height = 13 in

Volume = 

5) height = 14 ft ; length = 11 ft ; width = 8 ft

Volume = 

6) width = 3 yd ; height = 16 yd ; length = 18 yd

Volume = 

7) length = 20 in ; height = 9 in ; width = 7 in

Volume = 

8) A rectangular prism has a length of 12 feet, a width of 4 feet and a height of 8 feet. What is the volume of the prism?

Volume = 

Printable Worksheets @ www.mathworksheets4kids.com
A rectangular prism has a length of 12 feet, a width of 4 feet and a height of 8 feet. What is the volume of the prism?

Volume = \( 384 \text{ cubic feet} \)

B) Find the volume of each rectangular prism from the given parameters.

4) length = 19 in; width = 17 in; height = 13 in  
Volume = \( 4,199 \text{ in}^3 \)

5) height = 14 ft; length = 11 ft; width = 8 ft  
Volume = \( 1,232 \text{ ft}^3 \)

6) width = 3 yd; height = 16 yd; length = 18 yd  
Volume = \( 864 \text{ yd}^3 \)

7) length = 20 in; height = 9 in; width = 7 in  
Volume = \( 1,260 \text{ in}^3 \)

8) A rectangular prism has a length of 12 feet, a width of 4 feet and a height of 8 feet. What is the volume of the prism?

\[ \text{Volume} = 384 \text{ cubic feet} \]
