

## Multiplication - Ice Skating Rink

1) Gina Newman enrolled in the Hoop Academy. She attended 12 sessions and spent 120 minutes in all. How many minutes did she spend in each session?

2) The Hoop Academy charges \$10 per session and 11 other children attended the same number of sessions. How much money did the academy receive in all?

3) Gina's brother, Hugo, attended 12 sessions at the Hoop Academy and rented roller skis for 3 hours in all. How much would he have to pay toward the rental?

4) Gina's big sister, Sasha is practicing for an inter-school skating championship at the Hoop Academy. If she puts in 3 hours of practice over 16 days, how many hours in all did she spend on her practice sessions?

5) Mr. Newman enrolls as part of a 6 member team in the Adult Ice Hockey League at the Hoop Academy. If each member has to pay \$500 toward registration, how much did Mr. Newman's team have to pay in all?
