

Name : \_\_\_\_\_

## Metric Unit Conversion

Liter and Milliliter: T2S3

Example 1 : 23.7 L = \_\_\_\_\_ mL

**1 liter = 1000 milliliters**

$$23.7 \text{ L} = 23.7 \times 1000 \text{ mL}$$

$$= \mathbf{23700 \text{ mL}}$$

Example 2 : 23700 mL = \_\_\_\_\_ L

**1000 milliliters = 1 liter**

$$23700 \text{ mL} = \frac{23700}{1000} \text{ L}$$

$$= \mathbf{23.7 \text{ L}}$$

Convert between liters (L) and milliliters (mL).

1) 15210 mL = \_\_\_\_\_

\_\_\_\_\_ mL

3) 66.324 L = \_\_\_\_\_

\_\_\_\_\_ L

5) 32500 mL = \_\_\_\_\_

\_\_\_\_\_ mL

7) 27.8 L = \_\_\_\_\_

\_\_\_\_\_ L

9) 79.2 L = \_\_\_\_\_

\_\_\_\_\_ mL

11) 88698 mL = \_\_\_\_\_ L

12) 10.2 L = \_\_\_\_\_ mL

13) 36220 mL = \_\_\_\_\_ L

14) 59000 mL = \_\_\_\_\_ L
