

Name : _____

GCF - Fractions

MS2

Reduce each fraction to its lowest term.

1) $\frac{24}{54}$
GCF of 24 and 54 = _____

$$\frac{24}{54} \div \frac{\square}{\square}$$

$$\frac{24}{54} = \underline{\hspace{2cm}}$$

2) $\frac{16}{44}$
GCF of 16 and 44 = _____

$$\frac{16}{44} \div \frac{\square}{\square}$$

$$\frac{16}{44} = \underline{\hspace{2cm}}$$

3) $\frac{19}{76}$
GCF of 19 and _____

$$\frac{19}{76} \div \frac{\square}{\square}$$

$$\frac{19}{76} = \underline{\hspace{2cm}}$$

5) $\frac{45}{48}$
GCF of 45 and _____

$$\frac{45}{48} \div \frac{\square}{\square}$$

$$\frac{45}{48} = \underline{\hspace{2cm}}$$

7) $\frac{8}{14}$
GCF of 8 and 14 = _____

$$\frac{8}{14} \div \frac{\square}{\square}$$

$$\frac{8}{14} = \underline{\hspace{2cm}}$$

8) $\frac{72}{81}$
GCF of 72 and 81 = _____

$$\frac{72}{81} \div \frac{\square}{\square}$$

$$\frac{72}{81} = \underline{\hspace{2cm}}$$
